DIDSBURY PIONEER

VOL. XIII

DIDSBURY, ALBERTA, WEDNESDAY, MAY 5th, 1915.

No. 18.

There's fashion in men's clothes as well as women's — not any foolish extremes, but an up-to-date style.

Men who like to follow the new — and do not want to be behind — will be interested in an inspection of the new Hobberlin fabrics for this season's wear.

What's correct in color effects — what's correct in pattern — you'll find in the very large range of materials shown by this house.

A Fine Business Man's Suit **\$20**
Tailored-to-measure.

Sole Agent for Hobberlin Tailoring

RAIN COATS

Prices range from \$3.75 to \$15.00

J. V. BERSCHT

Your Horse Pays For It — Not You!

The small sum you lay out for a TAPATCO Horse Collar Pad comes back to you many times over in the increased working power of your horses.

Your horse needs it just as surely as it needs feed and shelter. Wise horsemen use TAPATCO Pads.

This Pad Prevents Chafed Necks and Galled Shoulders

Fits any collar — is porous and affords ample ventilation. Composite Stuffing. Light, soft, springy and very absorbent. Keep your horse in tip-top condition.

Lost, Strayed or Estray ads. \$1 for four insertions in the Pioneer—they bring results.

Midnight Deliberation of Council

The Council met on Monday night and the session was the longest held this year, the Councillors hardly being able to keep their eyes open when they got through.

Mayor Osmond, Councillors Reed, Sinclair, Wood, Paton, Herber, Secretary Brusso and Solicitor Austin present, Councillor Chambers absent.

Mr. Eph Shantz was present and addressed the Council on the over-assessment of lots in the Shantz estate south of the old mennonite church. These lots were surveyed in 1900 and have been assessed as such ever since but they should be on the acreage assessment. The lots had been assessed for far more than they were worth since Single Tax came into force.

The Council took up the matter and reduced the assessment for this year.

Complaints are still being made that pigs, chicken and horses are running at large and causing trouble. These will have to be taken more care of or other means will be taken against the owners for damages and the animals impounded.

The Council then resolved itself into a committee of the whole to go over the Assessors plans for the rental values and assessment. Several adjustments and equalizations were made, amongst the most important being the lowering of the assessments on property on Railway Ave.

This took up considerable time and the hands of the clock were at 12:30 when a bunch of very tired Councillors adjourned.

Didsbury Loses First Game

The first league game of baseball was played on the home grounds on Tuesday night, Olds paying us a visit and then being discourteous enough to beat us to the score of 6 to 12. The game was a fast one in spots, in other spots it was just ordinary. With more practice and a change or two made in positions the home team should make good before the season is out, there is some good material in the team. The line-up was as follows:

Didsbury	1	1	0	3	0	1—6
Olds	1	4	2	5	0	1—12

Batteries, Didsbury—Dowell, Gabel. Olds—Ulrey, Perrin and Gorman. Struck out by Dowell 12, by Ulrey 8, by Perrin 3.

Base on balls off Dowell 0; Ulrey 3; Perrin 1. Hits off Dowell 12; Ulrey 5; Perrin 1. Errors, Didsbury 12; Olds 4.

a drum and cornet. Instructor Johnson put the boys through their paces, and the way they carried out the signalling and physical exercises and drill was a pleasure to see and reflects credit on their instructor. Major Outhit complimented them after the inspection. After the parade was over Mr. Johnson had the boys marched down to Chambers ice cream parlors where he treated them to ice cream soda, which the lads appreciated as they had been given an afternoon's hard work. There were only a few spectators present which was unfortunate as the boys work was well worth seeing.

5,000 Casualties amongst Canadians

The total casualties suffered by the Canadians in the severe fighting at the Yser canal last week are greatly in excess of what was at first published. They will total over 5,000 when lists are complete.

EXTRA

A U. F. A. meeting will be held in the Fire Hall on Monday, May 17th. Come and bring your twine order. Business of importance—don't neglect this meeting. W. Dageforde, District Sec.-Treas.

The awful destruction of life which has been taking place in Europe is thus brought home to residents all over Canada. The Germans seem determined to use any and all means of exterminating the Allies and by their latest use of asphyxiating gases have roused such a storm of protest that it would not be surprising to hear that the Allies have finally been compelled to take the same means for retaliation.

The Allies are continuing the bombardment of the Dardanelles and are slowly making headway.

Italy still remains neutral and Germany has declared that if she gets into the war she will overrun Switzerland the same as Belgium to get at Italy.

IT STOPS THE TWINGES OF RHEUMATISM, LIMBERS THE MUSCLES, EASES THE JOINTS

Amazing Relief Comes at
Once—Cure Every Time

USE NERVILINE

Aching joints and sore muscles are common in rheumatic people. Inflammation is deep in the tissues. You might use a dozen remedies and derive less relief than Nerviline will give you in half an hour.

Nerviline is a pain-subduer that words do not altogether describe. It is fully five times stronger than most remedies, not that it affects the skin unfavorably—no, its great power is due to its wonderful penetrative quality—it strikes in deeply, but never burns or blisters.

Just rub Nerviline into sore muscles, stiff joints and note the glow of comfort, the ease of pain that follows.

You are astonished, delighted; this is because words do not express the promptness and permanency with which Nerviline cures every ache and pain in the muscles and joints.

Marvellous, you'll say. Natural, we say, because Nerviline is different, stronger, more penetrating, a true pain-subduer. Just try it and see if it doesn't cure rheumatism, neuralgia, lumbago, strains and sprains.

The large 50c family size bottle is far more economical than the 25c trial size. Get it today. Sold by dealers everywhere, or direct from the Catarthzone Co., Kingston, Canada.

Silent Scot True Till Death

Private Archie Bothwell, who is lying wounded at Belfast, says: There was a very odd chap among the last drafts of the Scottish Borderers. He always kept to himself, and would not say more than "Yes" or "No" if he could help it. One night the Borderers were driven out of the trenches and one of the men dropped with a couple of bullet wounds. His neighbor happened to be the odd chap that we had all declared to be the daftest of the daft. Without saying a word he knelt down by the wounded man, and, raising his rifle to his shoulder, waited for the oncoming Germans. By and by we rallied and dashed back to meet the Germans. The odd chap was dead, but the man he had tried to save was still breathing.

Indigestion and Headaches

Arising From Constipation, Cured and
Regular Habits Established by
Dr. Chase's Kidney-Liver
Pills

In the western provinces, where so many thousands live far from doctors and drug stores, very many rely on Dr. Chase's medicines to cure disease and maintain health and strength. This letter gives some idea of what perfect control Dr. Chase's Kidney-Liver Pills exert over the most common ills of life.

Mrs. H. K. Hower, farmer's wife, Eastburg, Alta., writes: "For about ten years I suffered from constipation, indigestion, headache and languid feelings. Treatment from two or three doctors afforded only temporary relief, so I turned to Dr. Chase's Kidney-Liver Pills, and with most satisfactory results. Headaches have disappeared, regular habits established and general health very much better. Both my husband and I can speak highly of Dr. Chase's Kidney-Liver Pills, as we have both been greatly benefited by them." One pill a dose, 25c a box, 5 for \$1.00, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

"I hope," said one wife to another, "that you never nag your husband."

"Only when he is beating the rugs," said the second one. "When he is thoroughly irritated he makes a much better job of it."

"Isn't Morton something of a mis-er?"

"I should say so. Why, he's too tight to risk a suggestion."

Value of Screenings

Feeding Test With Sheep Was Made
With Surprising Results

Screenings are sometimes considered as of no value. This is a mistake. The screenings are made up of seeds, the same as the grain, and these seeds contain the same food elements as the grains. To test the value of screenings an experiment was carried out by two students, Amos Even and Ephraim Westlund, at the North Dakota Agricultural College. They fed three pens of sheep. The first one was fed oats and bran, the second, pigeon grass seed, and the third, screenings. The feeding period covered 10 weeks. It was, to some, a little surprising to find that the sheep getting the oats and bran made the smallest gains. The screenings lot made 34 pounds more gain and used up only 12 pounds more screenings than lot one ate of the oats and bran. The lot that were fed the pigeon grass seed made 16 pounds more gain than the oat and bran lot and used up 12 pounds more of the pigeon grass seed than lot one ate of the bran and oats. This experiment brings out the value of the screenings that so often are left in the grain and nothing received for it.

Worms feed upon the vitality of children and endanger their lives. A simple and effective cure is Mother Graves' Worm Extremator.

Farming in Colorado

In 1880, Colorado had 4,506 farms, valued at 42 million dollars; in 1910, 46,170 farms, valued at nearly one-half billion dollars. The principal crops are wheat, oats, potatoes, sugar beets, alfalfa, livestock, fruit, flax, vegetables, dairying and poultry. The greatest acre yield in the country, according to returns to the United States department of agriculture, is in Colorado. The average yield of potatoes in 1913 was 110 bushels to the acre; wheat, 24 bushels; oats, 36 bushels; and hay two tons to the acre.

Spring Impurities In The Blood

A Tonic Medicine is a Necessity At This Season

Dr. Williams' Pink Pills for Pale People are an all year round tonic, blood builder and nerve restorer. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is so much in need of purifying and enriching, and every dose of these Pills helps to make new, rich, red blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils. Dr. Williams' Pink Pills speedily clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, indigestion, neuralgia, erysipelas and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people dose themselves with purgatives at this season, but these only further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but it does not cure anything. On the other hand Dr. Williams' Pink Pills actually make new blood, which reaches every nerve and organ in the body, bringing new strength, new health and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

You can get these health renewing Pills through any medicine dealer or by mail post paid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Encouragement

He—I shall never marry until I meet a woman who is my direct opposite.

She (encouragingly)—Well, my friend, there are numbers of bright, intelligent girls in this neighborhood.

A man must be an egotist to boast that he never has the wool pulled over his eyes.

A Modest Hero

Count Karolyi, on returning to his castle in Hungary, met, according to the Vossische Zeitung, one of his old servants who had just been sent back wounded from the war.

"My good man, I hear you fought valiantly at the front," said the count. "I should like to give you some reward. What shall it be?"

The old servant replied: "Well, if you insist upon it, sir, just give me enough kronen to reach from one ear to the other."

"That seems to be a very small reward," replied the count, smiling at the odd request.

"It's enough for me, sir," answered the servant, modestly.

As the count was about to comply with the strange request, he noticed that the servant had only one ear, and remarked upon the fact.

"Yes, sir, I left the other ear on the battlefield at Shabatz!" answered the modest man.

Minard's Liniment Cures Dandruff.

William Dean Howells said of modern American letters:

"In a New England village I entered the main street department store one afternoon and said to the clerk at the book counter:

"Let me have, please, the 'Letters of Charles Lamb.'"

"Post office right across the street, Mr. Lamb," said the clerk with a polite, brisk smile."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When the tube is inflamed, it has a tendency to close, and hearing is lost. When it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; this cannot be done by local applications, as they cannot reach the diseased portion of the ear. This is a constitutional disease, and requires a constitutional cure. Send for circular, free.

W. J. CHENEY & CO., Toledo, O.

Sold by Druggists, etc.

Take Hall's Family Life for constipation.

A Scottish laird invited an English friend to go salmon fishing with him. The Englishman hooked a salmon, but in his excitement fell into the stream. The keeper, seeing he was no swimmer, went to his aid, when the laird called out: "What are ye about, Donald? Get haud o' the rod and look to the feesh. He will wait, but the feesh winna."

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

McTavish (to convalescent soldier)—I was hearin' ye had a bullet in ye yet. Are ye no gawn ta hae it taen out?

Soldier—No, the noo. Ye see, I'll be gawn back ta the front in a wee while, an' when I come back I'll just hae them a' oot together.

"Don't you think a girl should marry an economical man?" asked Madge. "Oh, I suppose so," answered Dolly, "but I tell you it's awful being engaged to one."

Mrs. Wiseneighbour Says

"I should have told you the other day when we were speaking of EDDY'S WASHBOARDS that it is quite as necessary to have an Indurated Fibreware Tub in which to wash the clothes, if you want to make a success of wash day."

Mrs. Newlywed Says

"I've often heard of EDDY'S FIBREWARE PAILS AND TUBS. What's the difference between fibre and woodenware?"

"EDDY'S PAILS AND TUBS are made from compressed fibre baked at extreme heat. All in one solid piece. Cannot warp or fall apart. No chance of splinters. Wear longer, look better and are very light to handle. The latter point should always be a matter of consideration when buying kitchen utensils," concludes Mrs. Wiseneighbour.

Aunt—Are you getting along nicely at school, Charlie?

Charlie—Yes, Aunt, I've got the best place in the class.

Aunt—And where is that—at the top?

Charlie—No, near the fire.

It was an Irishman who objected to taking an emetic, as he was sure he couldn't keep it down.

Paint on Putnam's Extractor tonight, and corns feel better in the morning. Magical the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of Putnam's Extractor today.

NOTICE OF JUDICIAL SALE OF FARM LANDS

Pursuant to the Order made in the action of North of Scotland Canadian Mortgage Company Limited vs. Orris W. Hembling et al., the Southwest Quarter and the Southeast Quarter of Section 4 in Township 31, Range 27, West of the 4th Meridian, Alberta, will be sold by public auction at 2 o'clock in the afternoon on Saturday the 15th day of May, A.D. 1915 at or near the Post Office, Didsbury, Alberta.

The property consists of 326 acres, more or less, situate about 3 1/2 miles from the Post Office of Siebertville and 18 miles from the Railway Station of Didsbury. The vendor is informed that on the property are the following improvements—On the Southeast Quarter is a one storey house 12 x 20 with shingle roof, in fair repair, and a frame barn 18 x 26 and 12 feet high with a shingle roof. The half section is fenced all round and contains a 15 acre pasture field fenced off. The fence is of three strand wire and is in fair repair. There is also a well on the property close to the buildings. The soil is of black sandy loam with a clay and gravel subsoil. 125 acres of the land are under cultivation.

The property will be sold subject to a Reserve Bid fixed by the Court and subject to the reservations and conditions contained in the original grant from the Crown or appearing upon the existing Certificate of Title.

The purchaser will pay 15 per cent. of the purchase price on the day of the sale, 15 per cent in 90 days without interest, and the balance in three equal instalments in 1, 2 and 3 years with interest at the rate of 8 per cent. per annum. In all other respects the conditions approved by a Judge or the Master in Chambers will apply.

Further particulars may be obtained from Lent, Jones, Mackay & Mann, Calgary, Alberta, Solicitors for the Vendor.

DATED at the City of Calgary in the Province of Alberta, this 15th day of April, A.D. 1915.

LAURENCE J. CLARKE,
Clerk of the Court.

NOTICE

In the matter of the Court of Confirmation of the Tax Enforcement Return of the Town of Didsbury, in the Province of Alberta, take notice that His Honour Judge Carpenter, Judge of the District Court of Calgary, by order dated March 17th, A.D. 1915, has appointed Wednesday, the ninth day of June, 1915, at the hour of 10.30 o'clock in the forenoon, at the Court room, in the Town of Didsbury, as the time and place for the holding of the Court of Confirmation to confirm the Tax Enforcement Return of the Town of Didsbury, for taxes due to the said Municipality to December 31st, 1914.

A. BRUSO, Sec. Treas.

NOTICE

In the matter of the Court of Confirmation of the Tax Enforcement Return of the Rural Municipality of Mountain View No. 310. Take notice that His Honor Judge Carpenter, Judge of the District Court of Calgary has appointed Wednesday the Ninth day of June, 1915, at 10.30 o'clock in the forenoon in the Courthouse of Didsbury for the holding of the Court of Confirmation to confirm the Tax Enforcement Return of the Rural Municipality of Mountain View No. 310.

Dated at Didsbury this twenty-second day of March, 1915.

J. E. STAUFFER,
Sec. Treas.

STRAYED

W. C. T. U. COLUMN

Open Letter From W. C. T. U.

The Provincial W. C. T. U. has sent out an open letter to this effect:

"Because war conditions have caused such depression all over the Empire, we wish to state that this is no time for the Province of Ontario to trifle with the restriction of the liquor evil. If Canada is to help herself and the mother country we, as women of the Empire, want to know how we are expected to be patriotic to a spirit of evil and waste that is going on through the open bar and the open canteen.

"Canada is second to none in loyalty and devotion to the Empire, and our own boys are noted in the homeland for their ability and adaptability in service. They will win distinction for courage and conduct if they are given a chance, and we cannot afford to bear the reproach which has been brought upon them and the country they serve because our Government has broken faith with the motherhood of our land and has permitted the wet canteen to be reintroduced in the overseas encampments.

"The nations are realizing as never before that the ravages of the drink traffic are more to be dreaded than the devastations of war. Russia was the first to translate this knowledge into action, and has already proved its wisdom from both an economic and moral standpoint. The Scandinavian nations and France have passed measures of protection. Our enemies even are legislating for the good of their forces, because they believe the soberest nation will ultimately win.

"Lord Kitchener says the people of the United Kingdom are confronted with the alternatives of sobriety and victory or inebriety and defeat.

"It may be surprising to the Provincial Governments to know that there are Canadian mothers who are detaining their sons and husbands from the seat of war because of the waste policy of the liquor traffic in Canada and England.

"With a conservative estimate of statistics given us it is well within the mark to say that the liquor traffic costs this country more than \$200,000,000 per year. The liquor paid for by the consumer amounts to over \$100,000,000 per year. The cost of liquor through loss of life, time, labor, police and court expenses, reformatories and jails amounts to over \$100,000,000 per year.

"The revenue which comes from the liquor traffic and which we hear so much about is not more than \$25,000,000, thus leaving a loss alone in dollars and cents to Canada of \$175,000,000 per year. How long will the Canadian Provinces wait before this wastage be stopped?"

The ladies of the W. C. T. U. feel much encouraged by the response this petition has met with.

Vigilance the Price of a Good Complexion

To retain the natural beauty of the skin only proper care and treatment is needed. Our skins are naturally clear and healthy, but the demands of everyday life and unnatural living quickly spoil their freshness and beauty. So necessary is this care that no woman can afford to neglect it. The Nyl people have just issued a new booklet, "Your Complexion," which contains most useful and interesting information on how to care for the complexion in such a way that its beauty and freshness will be preserved for many years. It also includes directions for best methods of massage. The constant use of some good preparation, such as Nyl's Face Cream, is absolutely necessary to keep the skin really clean and healthy. It is a nourishing, oxygenated, greaseless skin-food which leaves no shine. Get a 3c or 5c jar and rub it gently into the skin. See how quickly it is absorbed, leaving the skin pleasantly refreshed and delicately fragrant.

All Nyl preparations are justly famous, and none more so than Nyl's Face Cream, which we unhesitatingly recommend. Call or telephone us for your copy of this book, which contains most valuable information.

British Prisoners in Germany

From time immemorial prisoners of war have evoked pity and sympathy. The agonies and humiliations of the first prisoners must be indescribably acute and galling. But from that state of suffering there can be no redress, it being part of the fortunes of war, but the state of comforts and food stands in a different category. This want will grow in volume and intensity as the days go by.

As a result of an official organization having been created recently to carry parcels to the British Prisoners in Germany, insuring proper transmission through a neutral carrier, the "Khaki" Magazine of Imperial House, Kingsway, London, has started a Fund to supply food and comforts for those who have no relatives or friends to look after them, as it is known that these poor fellows are not getting a proper supply of food.

An appeal is made to you for Two Dollars, as there are so many demands made upon you in other directions. This money will go for the direct benefit of the Prisoners, as there is no cost of transmission and no waste of any description, information having been established showing the kind of food and clothing etc., which can be sent without confiscation by the German Government.

This appeal should get a large response as there is no other fund which deals with this particular condition.

The "KHAKI" Magazine and Cabled News Sheet was created primarily as a gift for the Overseas Soldiers, bringing them late news from their homes. It is now supplying, free of charge, in addition to the soldiers at the front and in training, the various hospitals in England and France, as well as the Grand Old Fleet. It is a purely patriotic endeavor and in no way commercial.

When the "Khaki" Magazine was founded, amongst the many who gave their support and expressions of goodwill for the work it had undertaken, were:

The Duke of Wellington, K. G.
The Duke of Manchester.
The First Lord of the Admiralty
The Countess of Zetland.
Lady Leven.
Mrs. Leopold de Rothschild.
Lieut. General Sir Robert Baden Powell, K. C. V. O.
The Right Hon. Austen Chamberlain, P. C. M. P.
Lord Desborough.
The Earl of Essex.
Viscount Bryce, Lord Willoughby de Broke.

The Earl of Ronaldshay.
Viscount Milner.
Earl of Kintore.
Sir Gilbert Parker, M. P.
Sir William Bull, M. P.
Mr. Evelyn Cecil, M. P.
The Right Hon. Sir Charles Johnston, Lord Mayor of London.
The Right Hon. J. E. Rayner, Lord Mayor of Liverpool.
The Right Hon. W. H. Bowater, Lord Mayor of Birmingham.
The Right Hon. James Taggart, Lord Provost of Aberdeen.
The Right Hon. Crawford McCullagh, Lord Mayor of Belfast.

All subscriptions will be published in this paper, and you are requested to

send yours to any office of the Royal Bank of Canada, and mark it "KHAKI PRISONERS' FUND." The subscriptions will also be duly acknowledged in the magazine and various newspapers in England from time to time.

Empire Day Celebration

The Executive Committee of the Band held a meeting on Thursday evening last to consider matters for the welfare of the organization. President Osmond in the chair.

After some routine business had been transacted the question of raising funds for the Band was taken up and it was decided that a celebration should be held on May 24th, Empire Day.

A representative of the Didsbury Auto Co. was present and suggested that if the Band was willing the Ford Car Co., might be interested in the proposition to hold a Ford Picnic on the same day, all proceeds to go to the Band. This would mean most all of the Ford agents and owners of Ford cars from Calgary to Red Deer would attend it was unanimously decided to incorporate the two and to call it the Ford Picnic and Didsbury Sports Day, proceeds to go to Band funds.

Committees were then chosen to take up the matter and report at a meeting to be held on Monday night

MONDAY'S MEETING

The meeting on Monday night after hearing reports appointed the committees to do the work of getting up the programme.

The Auto Committee appointed at the previous meeting reported that the Ford people will arrange and supply suitable prizes for their part of the sports and that all their agents from Red Deer to Calgary will be requested to attend and to bring as many cars and people as possible.

Chamberlain's Liniment

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency), on certain conditions.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3 per acre. Duties—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

The Mystery of the Ravenspurs

By Fred M. White

Ward, Lock & Co., Limited
London, Melbourne and Toronto

(Continued)

"Tchigorsky!" Ralph cried. "Surely not in his natural guise. Oh, this is reckless folly! Does he court defeat at the outset of our enterprise?"

Tchigorsky bustled up. For some reason or other he chose to appear in his natural guise. Not till they were in the cab did Ravenspur venture to expostulate.

"Much learning has made you mad," he said bitterly.

"Not a bit of it," the Russian responded. "Unfortunately for me the priests of Lassa have discovered that I am deeply versed in their secrets. Not that they believe for a moment that Tchigorsky and the Russian who walked the valley of the Red Death are one and the same. They deem me to be the recipient of that unhappy man's early discoveries. But your identity remains a secret. The cleverest eyes in the world could never penetrate your disguise."

"It comforts me to hear that," Ralph replied. "Everything depends upon my identity being concealed. Once it is discovered, every Ravenspur is doomed. But I cannot understand why you escape recognition at the hands of the foe."

A bitter smile came over Tchigorsky's face.

"Can you not?" he said. "If you had your eyes you would understand. Man, I have been actually in the company of those who flung me into the valley of Red Death and they have not known me. After that I stood in the presence of my own mother, and she asked who I was."

"The marks on my face? Well, there are plenty of explorers who have been victims to the wire helmet and have never dreamt of entering Lassa. I am a broken, bowed decrepit wreck. I who was once so proud of my inches. The horrors of that one day have changed me beyond recognition. But you know?"

Ralph shuddered from head to foot. A cold moisture stood on his forehead.

"Don't," he whispered. "Don't speak of it. When the recollection comes over me I have to hold on to my senses as a shipwrecked sailor clings to a plank. Never mind the past—the future has peril and danger enough. You know why I am here?"

"To save your house from the curse upon it. To bring the East and West together, and tell of the vilest conspiracy the world has ever seen. Do you know who the guilty creature is, whose hand is actually striking the blow?"

"I think so; in fact I am sure of it. But who would believe my accusation?"

"Who, indeed! But we shall be in a position to prove our case, now that the secrets of the prison house lie before us. We the three to fear."

"Yes, yes," said Ralph. "The two Bonzes—who have actually been seen near Ravenspur—and the Princess Zara. Could she recognize me?"

Ralph asked the question in almost passionate entreaty.

"I am certain she could not," Tchigorsky replied. "Come, victory shall be ours yet. Here we are at my house at last. By the way, you must have a name. You shall be my cousin Nicholas Tchigorsky, a clever savant, who, by reason of a deplorable accident, has become both blind and deaf. Allez!"

CHAPTER VIII. A Master of Fence

Lady Mallowbloom's reception rooms were more than usually crowded. And every other man or woman in the glittering salon was a celebrity. There was a strong sprinkling of the aristocracy to lighten the lull; here and there the flash of red cloth and gold could be seen.

In his quiet masterly style Tchigorsky pushed his way up the stairs. Ralph Ravenspur followed, his hand upon the Russian's arm. He could feel the swish of satin draperies go by him; he caught the perfume on the warm air.

"Why do you drag me here?" he grumbled. "I can see nothing; it only bewilders me. I should have been far happier in your study."

"You mope too much," Tchigorsky said gaily. "To mingle with one's fellows is good at times. I know so many people who are here tonight."

"And I know nobody; add to which circumstances compel me to be dumb. Place me in some secluded spot with my back to the wall, and then enjoy yourself for an hour. I dare say I shall manage to kill the time."

There were many celebrities in the brilliantly lighted room, and Tchigorsky indicated a few. A popular lady novelist passed on the arm of a poet on her way to the buffet.

PRODUCING VACCINES & SERUMS UNDER U. S. GOV. LICENSE

"A wonderful woman," the fair authoress was saying. "Eastern and full of mystery, you know. Did you notice the eyes of the Princess?"

"Who could fail to?" was the reply. "They say that she is quite five and forty, and yet she would easily pass for eighteen, but for her knowledge of the world. Your Eastern Princess is one of the most fascinating women I have ever seen."

Others passed, and had the same theme. Ralph stirred to a faint curiosity.

"Who is the new marvel?" he asked.

"I don't know," Tchigorsky admitted. "The last new lion, I suppose. Some pretty Begum or the wife of some Oriental whose dark eyes appear to have fired society. By the crowd of people coming this way I presume the dusky beauty is among them. If so, she has an excellent knowledge of English."

A clear, sweet voice arose. At the first sound of it, Ralph jumped to his feet and clutched at his throat as if something choked him. He shook with a great agitation; a nameless fear had him in a close grip.

"Do you recognize the voice?" Ralph gasped.

The Russian was not unmoved. But his agitation was quickly suppressed. He forced Ralph down in his seat again.

"You will have to behave better than that if you are to be a trustworthy ally of mine," he said. "Come, that is better! Still still; she is coming this way."

"I'm all right now," Ralph replied. "The shock of finding myself in the presence of Princess Zara was overpowering. Have no fear for me."

A tall woman, magnificently dressed, was making her way towards Tchigorsky. Her face was the hue of old ivory, and as blue; her great lustrous eyes gleamed brightly; a mass of hair was piled high on a daintily poised head. The woman might have been extremely young so far as the touch of time was concerned, but the easy self-possession told another tale. The red lips tightened for an instant, a strange gleam came into the dark magnetic eyes as they fell upon Tchigorsky. Then the Indian Princess advanced with a smile and held out her hand to the Russian.

"So you are still here!" she said. "There was the suggestion of a challenge in her tones. Her eyes met those of Tchigorsky as the eyes of two swordsmen might meet. There was a tigerish playfulness underlying the words, a call note of significant warning."

"I still take the liberty of existing," said Tchigorsky. "You are a brave man, doctor. Your friend here?"

"Is my cousin Nicholas Tchigorsky! The poor fellow is blind and dumb, as the result of a terrible accident. Best not to notice him."

The Princess shrugged her beautiful shoulders as she dropped gracefully into a seat. "I heard you were in London," she said, "and something told me that we should meet sooner or later. You are still interested in occult matters?"

Again Ralph detected the note of warning in the speech. He could see nothing of the expression on that perfect face; but he could judge it fairly well.

"I am more interested in occult matters than ever," Tchigorsky said gravely, "especially in certain discoveries placed in my hands by a traveler in Tibet."

"Ah, that was your fellow-countryman. He died, you know?"

"He was murdered in the vilest manner. But before the end, he managed to convey important information to me."

"Useless information unless you had the key."

There was one traveller who found the key, you remember?"

"True, doctor. He also, I fancy, met with an accident that, unfortunately, resulted in his death."

Ralph shuddered slightly. Princess Zara's tones were hard as steel. If she had spoken openly and callously of this man being murdered, she could not have expressed the same thing more plainly. A beautiful woman, a fascinating one; but a woman with no heart and no feeling where her hatreds were concerned.

"It is just possible I have the key," said Tchigorsky.

The eyes of the Princess blazed for a moment. Then she smiled.

"Dare you use it?" she asked. "If you dare, then all the secrets of heaven and hell are yours. For four thousand years the priests of the temple at Lassa and the heads of the family have solved the future. You know what we can do. We are all powerful for evil. We can strike down our foes by means unknown to your boasted Western science. They are all the same to us, proud potentate, ex-meddling doctor."

There was a menace in the last words. Tchigorsky smiled.

"The meddler doctor has already had personal experience," he said. "I carry the marks of my suffering to the grave. I remember how your peasants treated me and this does not tend to relax my efforts."

"And yet, you might die at any moment. If you persist in your studies you will have to die. The eyes of Western men must not look upon the secrets of the priests of Lassa and live. Be warned, Dr. Tchigorsky, be warned in time. You are brave and clever, and as such command respect."

If you know everything and proclaim it to the world—

"Civilization will come as one man, and no stone in Lassa shall stand on another. Your priests will be butchered like wild beasts; an infernal plague spot will be wiped off the face of the outraged earth!"

The Princess caught her breath swiftly. Just for one moment there was murder in her eyes. She held her fan as if it were a dagger ready for the Russian's heart.

"Why should you do this thing?" she asked.

"Because your knowledge is diabolical," Tchigorsky replied. "In the first place, all who are in the secret can commit murder with impunity. As the Anglo-Saxon pushes on to the four corners of the earth that knowledge must become public property. I am going to stop that if I can."

"And if you die in the meantime? You are bold to rashness. And yet there are many things that you do not know."

"The longer I live, the more glaring my ignorance becomes. I do not know whence you derive your perfect mastery of the English tongue. But I do know that I am going to see this business through."

"Man proposes, but the arm of the priests is long."

"Ah, I understand. I may die tonight. I should not mind. Still, let us argue the matter out. Say that I have already solved the problem, I write twenty detailed statements; I enclose the key in each. These statements I address to a score of the leading savants in Europe."

"Then I place them in a safe deposit until my death. I write to each of those wise men a letter with an enclosure not to be opened till I die. That enclosure contains a key to my safe, and presently in that safe all those savants find a packet addressed to themselves. In a week all Europe would ring with my wonderful discoveries. Think of the outcry, the wrath, the indignation!"

The Princess smiled. She could appreciate a stratagem like this. With dull, stolid and averted face, Ralph Ravenspur listened and wondered. He heard the laugh that came from the lips of the Princess; he detected the vexation underlying it. Tchigorsky was a foeman worthy of her steel.

(To be Continued)

Demand for Beef

Prospects Are Bright For the Cattle Raising Industry in Western Canada

Much interesting information was contained in the report of the secretary of the Saskatchewan Cattle Breeders' association, at the annual meeting held at Regina recently. The report in part was as follows:

If anything, the situation with regard to the cattle breeding industry has become more serious, and the shortage of beef cattle more marked. This is not only true of the Dominion of Canada, but also of the United States, Great Britain and France. In fact, the shortage is world wide. The figures in proof of this are as follows: One year's decrease in cattle in Canada, 9.3 per cent.; United States, 3.3 per cent.; Britain, 2.1 per cent.; France, 9 per cent.

The shortage is acutely felt at the leading markets is shown by the following figures taken for the month of September, 1913 and 1914, at the six leading cattle markets in the United States, namely: Chicago, Kansas City, Omaha, St. Louis, St. Joseph and Sioux City. The total number received during September, 1913, was 954,181, and during September, 1914, was 814,985, or a decrease of 139,196.

It might not be fair to take that as an average decrease; but cutting these figures exactly in half we have a total decrease in cattle shipments for the year. At the above named markets, 835,176 head, or roughly speaking, 300,000 pounds of beef. This decrease for the entire United States for 1913 has been estimated at nine beef cattle per 100 people. Owing to the abolition of the United States tariff, a large number of Canadian cattle went south. The St. Paul market alone received 38,623 head.

The question may be asked, granting these figures to be correct, why the price of beef is not higher. In this regard it may be stated that the retail price of all meats in Canada today is approximately the same as in Great Britain. The average price of choice beef per pound live weight during 1914 at the leading western markets was: Choice steers, Toronto, 7.67 cents; Chicago, 9.33 cents; Montreal, 6.62 cents; Winnipeg, 6.07 cents; Calgary, 6.94 cents. Whilst the retailers' prices in the following cities were—Sirloin steak, Montreal, 22.7 cents; Winnipeg, 26.8 cents; Regina, 28 cents; Calgary, 22.8 cents. Medium chuck, Montreal, 18 cents; Winnipeg, 18.8 cents; Regina, 18.4 cents; Calgary, 15 cents.

The question deserves consideration.

The farmer who had a dozen good breeding females last fall, and in spite of the scarcity of feed, still has them is the man, who, if he is a stockman, is going to make money within the next three years. The market for good breeding females is not only here, but is here to stay. The motto of the cattle breeder should be: "Retain the good females, finish the steers properly."

Come home and take supper with me, Flannigan.

Share it's past yer supper time and it's furious yer wife'll be.

That's just it; she can't lick the two av us.

Canada-made goods must always be good goods.

So Good for Children

Millions of pounds of delicious "Crown Brand" Corn Syrup are sold every year to mothers, just for the children.

EDWARDSBURG

"Crown Brand" CORN SYRUP

Mothers know it is practically all nourishment. They know it is a food—that Bread spread with "Crown Brand" makes a well balanced food that sustains and builds up the strength.

Mothers know, too, that "Crown Brand" is the most economical "sweetening" for all sorts of Cakes, Pies, Puddings, and Sauces—and is the whole thing for delicious homemade Candies.

"LILY WHITE" is our pure white Corn Syrup—not so pronounced in flavor as "Crown Brand"—equally choice for the table and for candy making.

ASK YOUR GROCER—IN 2, 5, 10 AND 20 POUND TINS.

The Canada Starch Co., Limited, Montreal

Preparing Poultry

How Can These Thoughtless Farmers be Reached?

We have discussed the question of fitting poultry properly before shipping to market until it would seem that the trouble has become chronic with us. No one can appreciate the need for more education and demonstration along this very line until he sees for himself the boxes of birds that come to city dealers. Apart altogether from the act that feed is scarce, any thrifty farmer or farmer's wife would offer the most severe criticism if he or she could see what we have seen. The Central Farmers' Market of Winnipeg very wisely took a few specimens of poorly dressed birds and presented them before the delegates to the Grain Growers' convention at Brandon. Every farmer and farmer's wife who saw them was astonished to think that any farmer would be foolish enough to ship such stuff to market.

Yet that exhibit was quite typical of hundreds of pounds of dressed poultry that come on our western markets.

There is no possible excuse for shipping birds that are so thin that no city family would take them as a gift. Some geese and turkeys come on the market that are smaller than medium sized ducks, and ducks are shipped that would not make a meal for two. Some cases of all classes of fowl come to market half plucked, dirty, bloody and so thin that they can only be handled by restaurants for making pot pie. For this purpose the price is naturally very low. It is really astonishing to see the miserable condition in which some farmers send their poultry to market.

Now, who sends this poor trash? We know, as well as does the general public, that the thrifty farmer or farmer's wife would not think of shipping poultry to market before it was properly fattened, properly cleaned and dressed and presented in the best possible shape. If they had no grain to fatten them, they would keep them at home, and, if they wanted to know how to dress and pack them, they would find out rather than ship them in "any-old-shape." Such stuff is shipped by the disinterested, uneducated farmer, the man who does not take a farm paper and to whom the education afforded by our agricultural colleges does not appeal. He does not read; he does not know; and, perhaps, he does not care.

This class is always the most difficult to reach. How can they be reached? It will require some co-operative effort to reach them. For instance, one way would be for dealers to keep a list of the names of shippers who send forward this poor stuff and turn these names over to those who have charge of the educational work, say, our agricultural colleges or departments of agriculture. The shipper could then be reached direct by letters of information, or personally visited by a district representative or agricultural secretary, such as are found in some provinces of Canada.

Clear-Cut Facts

Some Good Advice and Information Regarding Economic Questions in Canada

The first essential for good crops is good seed.

Paradoxical as it may seem, the Allies are fighting for peace.

Cattle are down because cereals are up. Cattle were up when cereals were down. Such changes are inevitable in compliance with the laws of supply and demand.

Wheat-stuffs are rising in price in Britain. Before summer comes there will be a marked ascendance in Canada.

Every city, town and district should have a committee or commissioner of employment to help everybody to have work.

Farm labor is scarce all over Europe as well as in Canada. In Britain there is talk of putting boys on farms instead of sending them to school.

In the last three months of 1914 Canada's exports, principally of bread-stuffs, to Britain, compared with the same period of 1913, showed an increase in value of \$9,500,000.

A German scientist is said to have discovered a method by which straw can be converted into wholesome food for human beings. This is an excellent example of the result of enforced economy.

Good seed on good soil benefits both sower and reaper. It also advantages the country and helps the empire.

All warfare is savage, but civilized men whom the savage has called to arms must be clothed and fed.

All the countries of Europe, excepting only Russia, will this year need to be importers of wheat, of oats and of barley. So, too, will Australia, where the effects of last year's drought is still disastrously felt.

If the war lasts six months more, it is estimated that between five and six million horses will have been sacrificed.

Great Britain bought thousands of horses from Hungary during the South African war—a market that is completely closed to her now.

Lord Kitchener gives the war two years more to run. By that time, according to present progress, there will be three or four million fewer men, three or four times as many cripples, half a million blind or nearly blind, and a million nervous wrecks.

There are thousands of acres of unoccupied land in and around the cities and towns of Canada. If every acre were cultivated there would be work and food for all the unemployed and something to spare.

The Teacher—If there were four flies on a table and I killed one, how many would be left?

The Little Boy—One—the dead one.

A man is not necessarily a harsh taskmaster because he pays strict attention to business.

The Secret of Health is Elimination of Waste

Every business man knows how difficult it is to keep the pigeon holes and drawers of his desk free from the accumulation of useless papers. Every housewife knows how difficult it is to keep her home free from the accumulation of all manner of useless things. So it is with the body. It is difficult to keep it free from the accumulation of waste matter. Unless the waste is promptly eliminated the machinery of the body soon becomes clogged. This is the beginning of most human ills.

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY

Assists the stomach in the proper digestion of food, which is turned into health-sustaining blood and all poisonous waste matter is speedily disposed of through Nature's channels. It makes men and women clear-headed and able-bodied—restores to them the health and strength of youth. Now is the time for your rejuvenation. Send 50 cents for a trial box of this medicine.

Send 51 enclosed stamps for Dr. Pierce's Common Sense Medical Advice—1400 pages—worth 50c. Always handy in case of family illness.

FOR AGRICULTURAL CO-OPERATION AND DEVELOPMENT OF THE WEST

TO INCREASE THE AGRICULTURAL PRODUCTION

An Association of Farmers and Business Men Whose Aim will
Be to Disseminate Knowledge of the Most Approved
Farming Methods, and to Secure Greater Efficiency

A committee of Canadian agriculturists were induced to make a trip to North Dakota to investigate the work of agricultural instruction as carried on by the U.S. government. Mr. Geo. A. Merrick, of Winnipeg, has sent us their report, showing the result of their investigation, which is as follows:

Dear Sir,—The members of the committee selected to visit North Dakota and investigate at first hand the results of the Field Agent System of agricultural instruction, report:

The aim of your committee was to obtain as much information as possible from the farmers themselves in districts where the system is in operation, and through the courtesy of Mr. Thomas Cooper, director of the North Dakota Agricultural Experiment Station, and Mr. F. R. Crane, agricultural commissioner of the Great Northern Railway, we were enabled to spend three whole days motoring and interviewing farmers in the country tributary to Valley City, in the eastern part of the state; Minot, in the North Central District; Williston, near the western boundary; and a half day was spent on the return journey, in the Grand Forks district. We were also afforded an opportunity at each place to discuss with numerous bankers and business men the question of the results being accomplished, and no effort was spared to make the investigation a thorough one.

It is our unanimous opinion that the better farming campaign being conducted in North Dakota is proving successful in a remarkable degree, and is rapidly creating conditions which will ensure an enormous enhancement of the prosperity of the state, as well as contribute to a material improvement of the social conditions of farm life. From an investigation of the cost of the work we conclude that the expenditures thereon will be returned a hundredfold through increase of agricultural products.

We are further of the opinion that the experience of North Dakota, considered in conjunction with the history of agricultural progress in other parts of North America, serves to establish conclusively that the attainment of a thoroughly satisfactory development of the agricultural industry of a new country requires that there shall exist—as auxiliary to the departments of agricultural and experimental farms—an efficiently organized staff of field men to carry information to the farmers on their own farms.

As a natural consequence of the unparalleled rapidity of the settlement of Western Canada in the last few years we have admittedly an unusually large percentage of settlers whose knowledge of farming is slight, and it is therefore an obvious deduction that the result, which could be looked for from an efficient organization of field men would be proportionately greater here than in North Dakota.

The necessity for an organized movement to increase largely agricultural production in the prairie provinces by greater efficiency of farming methods is now widely recognized, and we cannot urge too strongly that steps be taken without delay to inaugurate the Field Agent System here, as the most effective means of accomplishing the desired end.

We think it well to add that in our opinion a movement along the lines recommended, in order to be productive of the maximum good, should take the form of a combination of the Farmers' Association, and the more important business interests to cooperate with the department of agriculture. We are not losing sight of the fact that the department of agriculture in all three of our prairie provinces are already doing excellent extension work. They are, however, somewhat hampered by lack of funds, and it is our conviction that the organization of a Field Agent System should be set on foot on a scale sufficient to demonstrate effectively its value with the least possible loss of time.

We attach a draft covering our suggestions for the organization of an Association of Farming and Business. Respectfully submitted,

Name: "Association of Farming and Business."

Form of Organization: An association to be incorporated by private act.

Purpose: To promote agricultural development in Western Canada. Support and Membership: The general funds of the association to be provided by subscriptions to be invited from all business and farming interests, a subscription of \$10 or more annually to entitle the subscriber to membership.

Further financial support to be solicited from municipalities in which the association conducts field operations. General Council: The association to be governed by a board of forty-two councillors chosen as follows:

Councillors:
By Grain Growers' associations 6
Live Stock Breeders' association 4
Agricultural Societies 3
Railways (one each) 3
Canadian Credit Men's association 4
Bankers' Association (western section) 3

Mortgage Loans association of Western Canada 3
Winnipeg Grain Exchange 2
Manufacturers' Association (Western Canada) 2
Implement Companies' association 2
Canadian Press association (Western branches) 2
Dominion Retailers' association (Western branches) 2

And six others to be selected by the foregoing, 22 in all, 10 to form a quorum.

Directorate: The affairs of the association to be administered by a board of nine directors, of which three to be appointed by the minister of agriculture and six by the general council.

The chief aim of the association being to increase agricultural production by disseminating knowledge of the most approved farming methods, it is proposed to adopt the plan now being followed under varying auspices in numerous parts of North America, of employing a staff of field agents to carry information to farmers on their farms and induce them to conduct their operations on lines recommended by the department of agriculture.

Superintendent: The field work to be in charge of a superintendent appointed by the board of directors, and selected with a view to his knowledge of the science of agriculture, as well as his qualifications as an executive. The responsibility for appointments of field agents will rest with him.

Field Agents: The work of each field agent may be more particularly described as follows:

1. Going to the individual farmer on his own farm and actively co-operating with him—taking up the particular problems presented upon each farm, and demonstrating through the farmers' own efforts satisfactory solutions. His activities will be entirely in the field. He will have no regular office, but will arrange to spend an hour or two periodically in different centres to meet all inquirers. Among the matters with which he will have to deal with are the following:

(a) Increasing yields per acre (i) treatment of soil conditions, (ii) better tillage methods and moisture conservation; (iii) selection of seed; (iv) proper rotation, introducing new crops of value, such as corn and alfalfa.

(b) Planning farmsteads, buildings, silos, etc.

(c) Selection, care and feeding of live stock.

(d) Prevention and eradication of weeds, pests and diseases of stock.

(e) Proper use and care of farm implements.

(f) Planting trees and vegetable gardens, and adding to convenience and attractiveness of farm homes and surroundings.

(g) General business management of farm, including simple system of records.

2. Reaching the family community generally through:

(a) Definite demonstration work, as above, on individual farms;

(b) Co-operation with branches of Grain Growers' associations and with the Live Stock Breeders' association;

(c) assisting in their marketing activities; (ii) locating good seed, sound stock, etc.; (iii) helping to obtain and distribute labor; (iv) addressing meetings (especially in winter time) and assisting in preparation of programs; (v) stimulating social features and general interest.

(c) Co-operating with those in the charge of agricultural fairs, especially by arranging for contests and prizes which will feature work done by the Association of Farming and Business—boys' and girls' competitions in crop growing, pork production, seed selection, stock judging, poultry, dairying, etc.

(d) Local short courses for farmers and also boys' camps.

(e) Working through rural schools by (i) stimulating interest of inspectors; (ii) addressing teachers at their association gatherings; (iii) popular talks to pupils, and (iv) encouraging various school contests.

(f) Distributing popular bulletins, circulars and posters.

3. Promoting co-operation of farmers and local business with a view to a better mutual understanding.

(a) Joint economic gain will be brought about from increased production and improved marketing methods, and a condition created whereby farmers will be enabled to purchase on a cash basis by reason of the fact that they will have products marketable throughout the year.

(b) From town merchants, bankers, etc., there will be sought practical support in giving farmer customers (whether dealing individually or co-operatively) the best possible treatment.

Anxious Lady—I say, my good man, is this boat going up or down?

Deckhand—Well, she's a leaky tub, mum. So I shouldn't wonder if she was going down. But then, again, her b'ilers ain't any too good, so she might go up.

An Aeroplane Gave Warning

Turned German Army From Its Dash
on Paris and Changed Whole
Line of Battle

An aeroplane scouting flight which made history has come to light, many months after it took place. The report of the two aviators making the flight turned Gen. von Kluck's column toward the south from its dash on Paris in August and changed the whole line of battle in the west.

A striking feature of the flight, moreover, was that its course did not follow orders, but was determined upon the initiative of the flyers. The story of the flight, taken from a German magazine, devoted to aeronautics, follows:

"It happened on the occasion of our dash on Paris. The inhabitants of the 'city of light' received a daily visit from German aviators. The latter were accustomed to drop a couple of bombs every day, but their visit here was not the object of their program. The chief thing was to keep watch of the movements of the Paris reserve army. This army had marched up with its front toward the east and one day an aeroplane went up to observe it again.

"The aviators were struck with the uncertain movements of the opponents of a German corps, who appeared to be having a trifling conflict with troops further north. Upon their own responsibility the aviators changed their course and flew off to the north.

"They flew and flew, for what they saw was well worth closer observation. Then they speeded back to headquarters and announced that a hostile army was marching upon von Kluck's flank.

"Nobody would believe it at first. Cavalry patrols had brought no news to indicate such a movement. But nevertheless it was true.

"The report resulted in the known new disposition of the German position in the west, and in the conferring of the Iron Cross of the first class upon the pilot and the officer observer.

The two men referred to are both first lieutenants. They but recently carried out an important flight over Warsaw.

Boy Scouts in England

Have Proven Their Value Since Outbreak of War

The Boy Scouts have proved their value since the outbreak of war.

Four hours after the call came, thousands of boys were at the disposal of their country. One morning a telegram reached a British commissioner asking for a thousand Scouts. The same evening he had four thousand standing by waiting for orders.

Many an adult warrior in the British Isles, first knew he was wanted when a Scout brought him a letter telling him where to report himself. The emergency substitution work of the lads was wonderful.

The suddenness of the war meant that many coastguards had to return immediately to the Navy. Yet their work was more necessary than ever.

Hundreds of Scouts took their places, and had the time of their lives staying out all night or watching all day through big telescopes for the enemies' ships.

It was a hardened journalist who confessed that a lump came into his throat when late one night he met a small group of Scouts dragging their trek cart, laden with bivouac gear, and moving quietly through the dark to their vigil on the cliffs.

Naval Code Book

Great Precaution Is Used to Guard the Secret Signals

Every navy has a secret code of signals different from the ordinary code in general use. This code is used only in time of war and in the presence of the enemy. If the enemy could read the signals he could secure a great advantage. So the secret code books are carefully guarded and none is more carefully protected than that of the United States navy. The secret code books are issued only to the executive officers of ships and every precaution is taken to prevent them being stolen by men in the service of foreign governments. The books are bound in heavy metal covers, so that if a vessel is threatened with capture the commander may throw his code book overboard and it will sink, thus avoiding seizure.

"There was a wonderful rain scene in the play last night."

"Realistic, eh?"

"I should say it was. Why, when the rain storm came up my corns began to hurt me."

HOW SUEZ CANAL IS KEPT OPEN

Millions of Feet of Dredging in a Year

Since 1896 something like 22,000,000 has been expended upon the widening and improvement of the Suez Canal. When first opened the channel had a uniform depth of 25 feet. It is now 31 feet deep, 108 feet wide at the bottom, and 420 feet at the water level. It is still being deepened and widened. Quite apart from this work says a writer in the London Magazine, a whole fleet of dredges are continually engaged on merely keeping the channel free from sand. We get some

SERIOUS SITUATION FOR GERMANY IF KRUPP WORKS SHOULD FAIL

THEY SUPPLY NEARLY ALL THE WAR MATERIAL

Persistent Reports that Germany is Running Short of Shot and Shell, and Should the Essen Firm Fail to Keep up with the Demand, it Might Bring about the End of the War

Germany's most vulnerable point may be expressed in a single word—Krupp's.

This great concern at Essen supplies practically the whole of Germany's war materials, and its inability to keep up with the enormous demands of the Kaiser's great armies may bring about the end of the war at a much earlier date than has yet entered into any one's calculations.

As a matter of fact, the capacity of the much vaunted Krupp works is not nearly so great as the aggregate capacity of Britain's five most important armament firms. Reports that Germany is running short of shot and shell are persistent, and are likely enough to be true, and it is notorious that Germany is making frantic efforts to secure supplies of metal by any means and at any price.

There is also plenty of evidence that Krupp-manufactured munitions are by no means so superior as many people have been led to believe, and we know, too, that the "colossus of armament firms" has been mixed up in scandals, bribery, and corruption. Germany has been very proud of its Krupp's and has had unbounded confidence in the huge Essen factory. In the supreme test now being applied Krupp's may fail the fatherland.

Founded at Essen 102 years ago as a factory for the production of "English cast steel," and employing only seventy workmen in 1848, this company now employs 70,000, of whom 38,000 are in the Essen steel works alone. The great Mannesmann iron and steel works at Düsseldorf, capitalized at \$5,000,000, has been absorbed into the Essen concern, bringing the combined share and loan capital of Krupp's up to \$11,500,000.

As an indication of the extent of the Essen works, it may be mentioned that the plant is served by eighty miles of private railway, and that the traffic between the works and the Prussian state system average between fifty and sixty trains daily.

The entire coal supply is furnished by the company's own collieries, which employ 10,000 men and produce nearly 3,000,000 tons a year. The firm's iron ore mines employ 5,000 men. The pig iron for the steel works is mostly supplied by the Friedrich-Alfred Hütte, another important unit of the Krupp organization. These famous iron works cover nearly 700 acres of land, and include seven blast

furnaces. The Annan steel works, another Krupp unit, manufactures open-hearth and crucible steel castings for naval purposes, and employs 1,000 men. The Cruesenwerke, at Maedburg, is another great branch, with 5,000 hands, manufacturing gun mountings, gun carriages and ammunition. The Germania shipyard, at Kiel, is yet another Krupp property, and now ranks among the three best establishments of its kind in the world. It has half a mile of water frontage, and can accommodate about ten of the largest vessels on the stocks at one time, besides torpedoes and other small craft.

A novel branch of the Krupp enterprise is a press bureau. Four thousand newspapers, technical magazines, reviews and books, besides a deluge of cuttings, are received at the Essener Hof monthly. No published report, article, or paragraph dealing with the subjects in which the many branches of the Krupp establishment are interested fails to reach the bureau. They are all indexed and filed.

The particulars—dimensions, age, and location—of every ship of war and practically every big gun in the world are carefully recorded at Krupp's, where the German naval and military authorities have a mine of ready information.

Lately this great firm has come under a cloud of suspicion which appears to be thickening. The case in which judgment was delivered a year ago shook the faith of not a few Germans in Krupp's, if not in the government which fostered and shielded the firm. It may be recalled that the scandal was first brought to public notice in the Reichstag in April, 1913, by the Socialist Liebknecht who had first communicated his charges against Krupp's to the war minister in November, 1912.

Although many documents were suppressed on the ground that they contained state secrets, and certain allegations were ruled out as irrelevant, the evidence which was permitted in open court was damaging.

There is no smoke without fire, and if only half the reports now current on the Continent are true, the limit of Krupp's capacity to supply the gigantic demands made by the Kaiser's military staff may be reached at any moment.

Production of Cows

Some Will be Found to be Much More Profitable Than Others—Test Will Tell

The Dominion department of agriculture, dairy division, Ottawa, issues the following bulletin, under the heading of "Economic Machines."

"Has it impressed itself on your mind, as a practical man, selling farm crops in the form of milk through the medium of cows' manufacturing apparatus, that possibly some of this automated machinery needs overhauling and closely examining? A new machine, running more economically, may save a manufacturer its cost several times over in a very short while. So if your cows were regarded in this light, some might be found to be very economical producers, and possibly the less said about the capacity of others the better.

"Some cow testing figures given to the dairy division, Ottawa, by dairy farmers prove that some herds of cows produce milk at a feed cost of \$1.45 per 100 pounds, while close by are other herds whose average feed cost of production is only 80 cents per 100 pounds of milk. Again, between two cows in the same herd the cost of feed per pound of butter-fat is frequently found to vary as much as from 23 to 49 cents.

What is of importance to the average dairyman is this fact, that cow testing helps to put each cow in the herd on a good paying basis very quickly. A simple plan of weighing and testing each individual cow's milk soon discovers if any unit machines in the milk making factory are not in good economical running order. Then that makes \$20 or \$30 or more clear profit above the cost of feed. Does each one of your cows do that? It will pay you to find out."

Most of a college man's education is acquired after he graduates.

Canada's Duty

Should Now Make Good the Boast That She is the Granary of the Empire

All sorts of prophecies are being made of the likely duration of the war. Lord Kitchener originally said three years. So far as newspaper reports are concerned there is no reason to believe he has changed his opinion. All that he is known to have subsequently remarked is that he didn't know when the war could end, but that he did know when it would begin—in May. This, of course, was taken as indicating that the real offensive campaign of the allies would then start. Meantime, beyond sending over contingents, the plain duty remains to Canada of being prepared for any contingency. This country is the nearest of the large overseas Dominions, and to this country Britain will naturally look for a great portion of her supplies. That she is doing so already is abundantly proven by the fact that the trade returns for the five months of the war that elapsed in 1914 show a decidedly marked increase. For the final quarter of the year, compared with the same period in 1913, that increase was no less than nine and a half million dollars, principally in the value of foodstuffs.

There is surely groundwork for thought in such a statement. Canada has proudly claimed to be the granary of the empire. It is now up to her to fulfil that boast, and not only in the matter of cereals, but also as regards beef, mutton, pork, bacon and vegetables. In cultivation of the last-mentioned the cities and towns can help by utilizing the present waste land either in their midst or in the surrounding territory. An uncultivated acre at these times implies extravagance both in soil and labor. Nobody can plead ignorance in these matters when he can write to the Publications Branch, Department of Agriculture, Ottawa, and obtain absolutely free, bulletins and pamphlets giving information on how best to grow peas, beans, potatoes, turnips, onions, parsnips, carrots, Indian corn, wheat, oats and barley. Also on the breeding and rearing of live stock, and on dairy products, bee cultivation, etc. A letter to the department, addressed as stated, will bring a catalogue of upwards of two hundred of publications, all of which can be had gratuitously.

Over 69 per cent. of the working women in Philadelphia are earning less than enough in wages properly to sustain their living.

Cook—The tea is quite exhausted, ma'am.

Mistress—I noticed that it seemed very weak the last time.

Rural Municipality of Mountain View No. 310 Minutes

Minutes of the Council of the Rural Municipality of Mountain View No. 310 held at Olds May 1st, 1915.

All the members of the Council were present.

Reeve McCuen called the Council to order at 11:30 a.m.

The minutes of the last meeting held on March 6th were read.

Moved by Mr. Flinn that the minutes of last meeting be adopted as read. Carried.

Moved by Reeve McCuen that whereas Geo. Edler had signed a satisfactory agreement transferring 4.2 acres of the S. W. 17-31-27-4 to the Crown, that he be paid for compensation for the same the amount of \$84.00. Carried.

Moved by Mr. Flinn that L. Edler be refunded \$3.42 on taxes. Carried.

Moved by Mr. Metz that the payment of the following accounts be confirmed: J. E. Stauffer, March salary, \$90.00; School Fund, transfer, \$1,800. Carried.

On motion by Mr. Pearson a number of accounts were passed and ordered paid. Carried.

Moved by Mr. Flinn that a bounty of 1-2 cents each be paid as gopher bounty on all gophers killed up to June 1st.

Moved by Reeve McCuen in amendment, that 1 cent each be paid as gopher bounty on all gophers killed up to June 15th. Amendment carried.

Moved by Mr. Pearson that J. W. Bicknell and W. F. Moritz be appointed Weed Inspectors and be paid \$5.00 per day and to assume their duties on June the 15th. Carried.

Moved by Mr. Rupp that the Council adjourn to meet at Olds on Saturday, June 12th, at 11 a.m., on which date the council will sit as a Court of Revision of the Tax Roll for 1915. Carried.

Presented with Purse

A pleasant evening was spent on Saturday evening, May 1st, at the home of Mr. John Berscht, Westcott, the members and adherents of the Ev. Church gathering to prepare a pleasant surprise for Rev. J. D. Fenner on the eve of his departure for Niagara, Ont., the charge assigned him by the recent annual session of the Canada Conference of the Ev. church. The following address was read by the preacher in charge, Rev. L. P. Amacher, and the presentation of a well-filled purse was made by Mr. Amos Wilson:

REV. J. D. FENNER,
DEAR BROTHER IN CHRIST:—Having learned with regret that you have been called away from our midst, by the Annual Canada Conference of the Evangelical church, to your new field of labor at Niagara, Ont., we, your friends, have taken this method and opportunity, before your departure, to thank you for your service and help rendered in various ways, which we have appreciated and enjoyed. May the Lord ever abide with you and bless you and make you a great blessing on your new field of labor. We ask you to accept this gift as a token of our love and appreciation.

Signed in behalf of
THE EV. CHURCH AT WESTCOTT
Dated at Westcott, Alta.,
this 1st day of May, 1915.

DIED

NIXON—On Saturday, April 24th, 1915, Clarence James Macdonald Nixon, aged one year and 8 months, youngest son of Mrs. C. G. Carlson. Interment took place at Didsbury cemetery.

An Interesting Booklet

The Pioneer has just received a new booklet issued by the Department of Natural Resources of the Canadian Pacific Railway at Calgary, Alberta, describing the resources and advantages of Alberta, Saskatchewan and Manitoba, and setting forth the terms on which the Company's lands are offered to actual home-makers in these Provinces. The folder contains a vast amount of useful information, such as the averages of all leading grain crops in the three Provinces for a period of years, the average prices for the last five years, the elevator, flour mill and oatmeal mill capacity, statements of temperatures and precipitation, live stock tables, general information covering such points as customs, quarantine, and transportation regulations, public worship, school systems, agricultural education, railway facilities, public roads, system of taxation, voting regulations, rural telephones, water supply, system of land survey, cost of implements, building material, harness, furniture, dry goods and clothing, meat and groceries, and the capital necessary for a settler to make a proper start. The booklet is illustrated with 40 photographs of actual farm scenes in Western Canada, and included in it are maps in two colors of Alberta and Saskatchewan. All persons interested in opportunities afforded to home-makers in Western Canada should make a study of this folder, which may be had free of charge by addressing the Publicity Branch, Department of Natural Resources, Calgary, Alberta.

Ireland Boosts Population

First Time Since Year of Great Famine That This Has Happened
John Redmond, speaking at Manchester, said last year was the first since the great famine that the population of Ireland had actually increased. He had been told, he said, by responsible men in Canada and other overseas dominions, that an enormous proportion of the contingents were composed of Irishmen. The Irish race and now with the colors at least a quarter of a million of her sons, said Mr. Redmond. Sir John French came of good Irish stock, Admiral Beatty came from the county of Wexford and Admiral Carden from Tipperary, concluded Mr. Redmond.

Minard's Liniment Relieves Neuralgia.

Little Invasion of Men's Work
From the investigation made in the chief cities and towns of the United Kingdom concerning the effect of the war upon women wage earners, it is clear that only in the smallest degree is the war throwing into the hands of women work hitherto done by men. Exhaustive inquiries have failed to elicit evidence of any marked tendency to employ girls and women in the place of youths and men. Here and there one comes across instances of such substitution, but too rarely and on too small a scale to be other than exceptions to the general rule.

Women and Asthma.—Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Festivals, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

The Hellress.—Have you seen papa? The Duke—Yes, it's all off.
Hellress.—You don't mean to say that he refused to give his consent?
The Duke—Oh, no. He said he'd give his consent—but not another cent.

"You must remember Miss Banks—just think a moment."
"Oh, the rich girl."
"Yes; she's engaged to Jack Cadogan."
"Oh, the poor girl!"

RASH ALL OVER HEAD AND FACE

Of Baby. Could Not Sleep, Fretful and Cross. Itched and Burned. Hair Came Out. Cuticura Soap and Ointment Healed.

Darnley, P. E. I.—When my little girl was three days old a fine rash came out all over her head and face. At first I thought it was baby rash but after a week or two I found that it was very itching and she could not sleep. She was getting very fretful and cross and it made her sick. It itched and burned so much that she used to scratch it until it became one solid mass of sore eruption and it made nearly all her hair come out. It was getting worse all the time and it spoiled her looks.

"I was told she had eczema and I got some ointment to use on her but it did no good. By the time she was four months old the eczema was all over her face, head and neck. I then decided to send for a sample of Cuticura Soap and Ointment. The first application relieved her of the itching. I then bought a box of Cuticura Ointment and two cakes of Cuticura Soap and used according to directions for eczema. I bathed her face and head with the Cuticura Soap and put the Cuticura Ointment on gently and by the time the box of Cuticura Ointment and two cakes of Cuticura Soap were gone there was not a sign of eczema and she was completely healed." (Signed) Mrs. Philip Roach, May 12, 1914.

Samples Free by Mail

To prevent falling hair, remove crusts and scales, and allay itching and irritation of the scalp, Cuticura Soap and Cuticura Ointment are indispensable. Sold everywhere. Liberal sample of each mailed free, with 25-p. Skin Book. Address post-card "Cuticura, Dept. D, Boston, U.S.A."

W. N. U. 1047

No Alcohol, More Work

Marked Increase in the Productivity of the Worker in Russia
In an explanatory note accompanying the Budget Bill, the Russian minister of finance states that the termination of the mobilization has permitted the gradual re-establishment of the circulation of merchandise. Thus the loading of goods trucks during November was only 23 per cent. below that of November, 1913. Except in the considerable portion of the country occupied by the enemy, the industrial life of the country has not shown any sensible diminution. The situation is relatively favorable, and is explained by the increase in the productivity of the worker owing to the suppression of the sale of alcohol. The increase of productivity has reached 30 to 50 per cent. and compensates largely for the diminution in the number of workers due to the call to the colors.

They're Popular In Nova Scotia

WHY DODD'S KIDNEY PILLS ARE A HOUSEHOLD REMEDY

People Have Learned From Long Experience That By Curing the Kidney Ills They Benefit the Entire Body

Spry Harbor, Halifax Co., N.S.—(Special).—"I have taken a couple of boxes of Dodd's Kidney Pills and have received great benefit from them. They are certainly a fine pill for anyone suffering from kidney trouble." So says Mrs. Alex E. Nilchey, and she speaks the sentiments of a large number of the women of Nova Scotia. Dodd's Kidney Pills have so long been in general use that they are recognized as the standard remedy for kidney troubles. They have become a family medicine in thousands of homes. People have learned from long experience that if they cure their minor kidney ills with Dodd's Kidney Pills they need not fear those more terrible developments such as Bright's Disease, Diabetes, Dropsy and Rheumatism. They have also learned that when the kidneys are cured by Dodd's Kidney Pills the whole body benefits. For cured kidneys mean pure blood, and pure blood is the foundation of all health. That's why Dodd's Kidney Pills are universally popular.

Och, Sure and Ye Won't

A famous hospital surgeon was imparting some clinical instruction to half a dozen students who accompanied him on his rounds. Pausing beside the bed of an Irishman who was a doubtful case, he said, "Now, gentlemen, do you think this is or is it not a case for operation?" One by one the students made their diagnosis, and all of them came to the conclusion it was not. "Well, gentlemen, you are all wrong," said the surgeon, "and I will operate tomorrow." "Och, sure and ye won't," exclaimed Paddy as he rose from his bed. "Six ter wan is a good majority. Nurse, give me my clothes, I'm going home."

There is no poisonous ingredient in Holloway's Corn Cure, and it can be used without danger of injury.

Loss of Army Horses 15 P.C. Per Year

Since the beginning of the war the loss of horses has been at the rate of fifteen per cent. per annum, said H. J. Tennant, parliamentary under-secretary for war, in a discussion of the army administration in the house of commons. He compared these figures with a loss of between 55 and 60 per cent. of the horses in the South Africa war, and said it indicated a great advance for the army veterinary authorities. The loss of army horses is due to pleuro-pneumonia chiefly.

Minard's Liniment Cures Burns, Etc.

"I want to sue Dr. Blank for heavy damages!" said the citizen, entering the lawyer's office. "What has he done?" asked the attorney. "When he operated on me he left a pair of surgical scissors in me. How much can I sue him for?"
"Oh, don't sue him at all," counseled the lawyer. "Just send him a bill for storage."

The people who go out looking for trouble might just as well stay at home.

For Love of the Work

Many Russian Women of the Wealthy Class Study Medicine and Nursing

The Russia of today has no social life, its women have no thought of dress and amusement. All are working for their country, and an exceptional number of the women of education in that country are specially qualified to be of service to the wounded soldiers. Speaking of her country, the wife of a Russian attaché in London said: "Perhaps the women of Russia study medicine and nursing more generally than is the case elsewhere, for in Russia the poorer classes look more naturally to those who are blessed with a larger share of this world's goods for care and protection. This feeling is now on the decline in towns, but in country places, where doctors have rounds of a hundred miles' radius, the poor of a district, in the absence of the medical man, are looked after and tended by the daughters of the house on whose estate they live. Thus every young girl goes in for medicine because she loves the work."

THE BEST MEDICINE FOR LITTLE ONES

Baby's Own Tablets are the best medicine in the world for little ones. They are absolutely safe and never fail to regulate the stomach and bowels, break up colds and simple fevers, expel worms and make teething easy. Concerning them Mrs. D. S. Bernhardt, Port Dalhousie, Ont., writes: "I have been using Baby's Own Tablets for my baby and would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Has Surplus of Women

Unmarried Females Under 45 Years of Age in England Outnumber Males by Half Million

A volume in two parts containing evidence and papers submitted to the Dominion Royal Commission in London during its sittings in June and July last has been issued. The first section includes the report of the special committee of the Royal Statistical Society on the immigration of women from the United Kingdom to the dominions and a report on the distribution of sexes in various parts of the empire, with special reference to the surplus of women in the British Isles available for emigration, by Dr. E. C. Snow.

Dr. Snow, in the course of a paper on "The Magnitude of the Population of England Available for Emigration," recently read before the Royal Statistical Society, argued that, apart from military considerations, there practically was no male population for emigration from England and Wales, but an appreciable number of unmarried women under forty-five, perhaps as many as half a million, could be spared. In the interests of the future development of the dominions the present deficiency in the number of women emigrants should be rectified.

The second section deals with communications. Among the contents are a memorandum by Mr. Charles Bright, the consulting engineer to the Commonwealth of Australia, and a statement of the views of the Empire Press Union on the subject of a state owned Atlantic cable. The transmission of newspapers between the United Kingdom and the dominions is referred to. The section also contains a memorandum drawn up by Mr. H. L. Drayton, chief commissioner of the Canadian Railway Board, on the subject of ocean freight rates to and from Canada.

Food Question

Settled With Perfect Satisfaction

It's not an easy matter to satisfy all the members of the family at meal times as every housewife knows.

And when the husband can't eat ordinary food without causing trouble the food question becomes doubly annoying.

A lady writes: "My husband's health was poor, he had no appetite for anything I could get for him. It seemed."

"He suffered severely with stomach trouble, was hardly able to work, was taking medicine continually, and as soon as he would feel better would go to work again only to give up in a few weeks."

"One day, seeing an advertisement about Grape-Nuts, I got some and he tried it for breakfast the next morning."

"We all thought it was pretty good although we had no idea of using it regularly. But when my husband came home at night he asked for Grape-Nuts."

"It was the game next day and I had to get it right along, because when we would get to the table the question, 'Have you any Grape-Nuts?' was a regular thing. So I began to buy it by the dozen pgs."

"My husband's health began to improve right along. I sometimes felt offended when I'd make something I thought he would like for a change, and still hear the same old question, 'Have you any Grape-Nuts?'"

"He got so well that for the last two years he has hardly lost a day from his work, and we are still using Grape-Nuts."

Name given by Canadian Postum Co., Windsor, Ont. Read, "The Road to Wellville," in pgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true and full of human interest.

What is an Internal Bath?

By R. W. Beal

Much has been said and volumes have been written describing at length the many kinds of baths civilized man has indulged in from time to time. Every possible resource of the human mind has been brought in to play to fashion new methods of bathing, but, strange as it may seem, the most important, as well as most beneficial of all baths, the "Internal Bath," has been given little thought. The reason for this is probably due to the fact that few people seem to realize the tremendous part that internal bathing plays in the acquiring and maintaining of health.

If you were to ask a dozen people to define an internal bath, you would have as many different definitions and the probability is that not one of them would be correct. To avoid any misconception as to what constitutes an internal bath, let it be said that a hot water enema is no more an internal bath than a bill of fare is a dinner.

If it were possible and agreeable to take the great mass of thinking people to witness an average postmortem the sights they would see and the things they would learn would prove of such lasting benefit and impress them so profoundly that further argument in favor of internal bathing would be unnecessary to convince them. Unfortunately, however, it is not possible to do this, profitable as such an experience would doubtless prove to be. There is, then, only one other way to get this information into their hands, and that is by acquainting them with such knowledge as will enable them to appreciate the value of this long-sought-for, health-producing necessity.

Few people realize what a very little thing is necessary sometimes to improve their physical condition. Also, they have almost no conception of how little carelessness, indifference or neglect can be the fundamental cause of the most virulent disease. For instance, that universal disorder from which almost all humanity is suffering, known as "constipation," "auto-intoxication," "auto-infection," and a multitude of other terms, is not only curable, but preventable, through the consistent practice of internal bathing.

How many people realize that normal functioning of the bowels and a clean intestinal tract make it impossible to become sick? "Man of today is only fifty per cent. efficient." Reduced to simple English, this means that most men are trying to do a man's portion of work on half a man's power. This applies equally to women.

That it is impossible to continue to do this indefinitely must be apparent to all. Nature never intended the delicate human organism to be operated on a hundred per cent. overload. A machine could not stand this and not break down, and the body certainly cannot do more than a machine. There is certainly too much unnecessary and avoidable sickness in the world.

How many people can you name, including yourself, who are physically vigorous, healthy and strong? The number is appallingly small.

It is not a complex matter to keep in condition, but it takes a little time, and in these strenuous days people

have time to do everything else necessary for the attainment of happiness but the most essential thing of all, that of giving their bodies their proper care.

Would you believe that five to ten minutes of time devoted to systematic internal bathing can make you healthy and maintain your physical efficiency indefinitely? Granting that such a simple procedure as this will do what is claimed for it, is it not worth while to learn more about that which will accomplish this end? Internal Bathing will do this, and it will do it for people of all ages and in all conditions of health and disease.

People don't seem to realize, strange to say, how important it is to keep the body free from accumulated body-waste (poisons). Their doing so would prevent the absorption into the blood of the poisonous excretions of the body, and health would be the inevitable result.

If you would keep your blood pure, your heart normal, your eyes clear, your complexion clean, your mind keen, your blood pressure normal, your nerves relaxed, and be able to enjoy the vigor of youth in your declining years, practice internal bathing, and begin today.

Now that your attention has been called to the importance of internal bathing, it may be that a number of questions will suggest themselves to your mind. You will probably want to know WHAT an Internal Bath is, WHY people should take them, and the WAY to take them. These and countless other questions are all answered in a booklet entitled "THE WHAT, THE WHY AND THE WAY OF INTERNAL BATHING," written by Doctor Chas. A. Tyrell, the inventor of the "J.B.L. Cascade," whose lifelong study and research along this line make him the pre-eminent authority on this subject. Not only has internal bathing saved and prolonged Dr. Tyrell's own life, but the lives of multitudes of individuals have been equally spared and prolonged. No other book has ever been written containing such a vast amount of practical information to the business man, the worker and the housewife. All that is necessary to secure this book is to write to Dr. Tyrell, at Room 645, 250 College street, Toronto, and same will be immediately mailed to you free of all cost or obligation.

Perhaps you realize now, more than ever, the truth of these statements, and if the reading of this article will result in a proper appreciation on your part of the value of internal bathing, it will have served its purpose. What you will want to do now is to avail yourself of the opportunity of learning more about the subject, and your writing for this book will give you that information. Do not put off doing this, but send for the book now, while the matter is fresh on your mind.

"Procrastination is the thief of time." A thief is one who steals something. Don't allow procrastination to cheat you out of your opportunity to get this valuable information, which is free for the asking. If you would be natural be healthy; it is unnatural to be sick. Why be unnatural when it is such a simple thing to be well?

Treatment of Indians

The world has been greatly surprised that our handling of the Indian problem has been so singularly inferior to that of the Canadian method, for in Canada, though dealing with many of the same tribes of Indians that dwell on this side of the border, there has never been any serious trouble, no Indian wars, but, on the contrary, a state of peace and harmony altogether admirable.

The Canadians have from the beginning treated the Indians considerately and with regard for their welfare. Their ways of living and modes of thought were studied sympathetically and understood almost from the beginning of the settlement of the country and the result has been such as to make the Canadian record enviable alike for its success and its justice.—Buffalo News.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectic Oil will allay the inflammation and in consequence the cough will cease. Try it, and you will use no other preparation for a cold.

Frenchman.—You are funny people, you Englishes. You take strong whiskey; you put water in it to make it weak; you put sugar in it to make it sweet; you put lemon in it to make it sour; then you say 'here's to you,' and drink it yourself."

Minard's Liniment for sale everywhere.

When the little son was about two weeks old a friend arrived to see the new-comer. "How is the little youngster?" was the first inquiry. "Oh, fine," replied the proud mother. "He seems to be growing more like his father every day." "Too bad," said the friend sorrowfully. "And have you tried everything?"

Bess.—Jack seems perfectly devoted to you. Why don't you marry him?
Betty.—Oh, I like to have him devoted to me.

Oil Burning Locomotives

Grand Trunk Pacific Will Use Them to Reduce Fire Risk on B.C. Division

The Grand Trunk Pacific railway has announced that contracts have been let and other arrangements made for the installation of crude oil as locomotive fuel on their passenger engines to be operated between Prince Rupert, B.C., and Jasper, Alta., a distance of 718 miles. It is expected that this installation will be complete by June. The announcement does not cover the use of oil burners on freight engines; it is understood that these will continue to use coal, at least for the present.

Kitty.—Jack told me last night that I was the prettiest girl he'd ever seen.

Ethel.—Oh, that's nothing; he said the same to me a year ago.

Kitty.—I know that, but as one grows older one's taste improves, you know.

Prize Lists will be out early in May. If you do not have one sent to you, apply

PARKER R. REED,

SECRETARY-TREASURER

MILK DELIVERY

I wish to announce that I am now in a position to deliver milk and cream to any place in Didsbury. I have taken over the routes formerly covered by Messrs. Gibson, Wollen and Bloxham and if any of their customers are being overlooked please notify me. I will deliver milk regularly summer and winter and promise satisfaction. Your esteemed business solicited. Phone orders to phone 12. C. YOUNG, Didsbury

Is your subscription to the Pioneer paid up?
We need the money.

Rev. S. W. Gamble has received an invitation to lecture at the Panama Pacific Exposition at San Francisco under the auspices of the International Lord's Day Congress on the "Foundations of the Sabbath" to prove that Sunday is the true Sabbath. This is the second Congress that Mr. Gamble has been called upon to lecture, the last time was at the St. Louis fair in 1904. Mr. Gamble intends to accept the invitation and will be leaving Alberta some time in July.

AROUND THE TOWN

If you want waste paper to lay under your carpets we have lots of it at 10c per bundle. The Didsbury Pioneer.

Miss A. Erb was quietly married to Mr. Merton Stevens of Edmonton, at Wetaskiwin, on Tuesday, April 27th.

Mrs. Sexsmith, Mrs. Moyle and Mrs. Stauffer will have charge of the Red Cross Depot this week.

R. G. Edwards will preach in the Baptist church on Sunday evening. Subject, "Almost a Man." Come and compare ideals of manhood.

A meeting of the Dairymen's Association will be held at the Fire Hall, Didsbury, on Tuesday, May 11th at 2 o'clock sharp. Business of importance to be discussed. P. P. Dick, Secretary.

Miss Dora Acton, bookkeeper for J. V. Berecht, has recovered from her recent severe illness and is being welcomed again amongst her many friends.

Mrs. G. F. Blackwell of Lindsay, Ont., was visiting with Dr. and Mrs. A. J. Weart over the week end on her return from the Panama Exposition.

Jack Baptist, a former Didsbury old-timer, who has been located at Sunnyslope for the last year or two, has again returned to Didsbury and is now the proprietor of the Alberta Livery barn which he formerly owned. Jack will be welcomed back by his many friends in the district.

The Misses H. Crowe, Nora Moore and Marcella Moon, and Herb Liesemer, and C. Carver returned from Normal school, Calgary, on Saturday. They have all been successful in passing their teaching practice exams and return with the highest certificates in second class.

Mr. E. B. Parker's residence at Rugby was nearly demolished by fire on Tuesday morning. The kitchen was completely destroyed but with the help of three visitors who were staying at the house the fire was put out before doing any more damage.

The management of the Moving Picture Opera House is still making improvements for the benefit of their patrons. The pictures, which are secured from the Universal Film Co., the largest picture concern doing business in the west, are all passed by the Censor being shown, and the orchestra, which plays every night, is giving new music. The pictures are shown every Tuesday and Saturday nights. Mr. Silsbee should receive the support of the public in his effort to provide clean amusements.

A District Convention of the W. C. T. U. will be held in the Evangelical church, Didsbury, on Thursday and Friday, May 13th and 14th. A good programme has been prepared. On Thursday evening Mrs. McKinney, Provincial President, will give an address, and on Friday evening there will be a gold medal contest in which Olds, Berlin and Didsbury contestants will take part. It is important that all members should attend as many sessions as possible, and the public are, as well, cordially invited to attend, especially the evening meetings, as they will be very interesting.

"LINOLEUMS"

A large consignment just put into stock
